## **COROFY LUXURY CLOTHING**

Corofy is a powerful brand that straddles the ready-to-wear industry with a massive range of year-long clothing for the young, fashion-conscious adult. Believing that children from upwardly mobile families, too, deserved to follow in their parents' footsteps it forayed into children's garments with a puckish range of comfort wear.

Today, Corofy is not just an exceptional brand it is emerging as a symbol of all that fashion should be. In its studios are tomorrow's garments under development and on its floors the latest machines that will make them possible. For a brand with such immense consumer reach and fan following, it's no surprise that in the last nine years Corofy has pushed the envelope on high-fashion to reach a brand value of 2870 crores.

No longer a brand limited to just the premium segment Corofy, despite its premium looks and pricing, has penetrated into the mass market. Along the way the brand has gained the ISO 9001:2000 certification and has been felicitated by the International Wool Secretariat with the prestigious Best Exhibited Product award. It has also emerged as the number one brand in the menswear category in a survey conducted in the summer of 2009.

## Shell Chemicals

Shell Chemicals is the petrochemicals arm of Royal Dutch Shell. The name "Shell Chemicals" refers to the nearly seventy companies engaged in chemicals businesses for Shell, which together make up one of the largest petrochemical producers in the world.

### History

Shell companies first entered the chemicals industry in 1929, via a partnership with Koninklijke Nederlandsche Hoogovens en Staalfabrieken in the Netherlands called NV Mekog, which manufactured ammonia from coke-oven gas produced at the steelworks in IJmuiden. Meanwhile, in the United States, the Shell Chemical Company (founded 1929) began the world's first production of ammonia from natural gas in California in 1931. It also started production of chemical solvents from refinery gases in California during the early 1930s while in 1942 it pioneered the production of butadiene, a key raw material for synthetic rubbers. In 1941, production of Teepol liquid detergent began at Stanlow in the UK, the first manufacture of a petroleum-based organic chemical in Europe, Teepol is now manufactured by Teepol Products UK based at Orpington in Greater London, from there it is sold worldwide. In the decades that have followed, Shell Chemicals companies have been significant players in the growth of the global petrochemicals sector and have developed some of its key manufacturing processes.

### Portfolio of businesses

The Shell Chemicals portfolio is focused on six product businesses and two international joint ventures. It includes the operation a number of large-scale plants that produce high volume products. The companies included in Shell Chemicals employ around 8,500 people worldwide.

### Key manufacturing locations

Shell Chemicals companies source product from manufacturing facilities around the world. Some of these facilities are operated by Shell Chemicals companies, some by other businesses within the Shell Group and others by joint ventures in which Shell holds varying levels of investment. Currently, Shell Chemicals companies' main manufacturing locations for petrochemical building blocks are:

Stanlow, UK  
Deer Park, USA  
Geismar, USA  
Mobile, USA  
Norco, USA  
Scotford, Canada

**Type: Private Sector**

**Sector: Petrochemicals**

## **Albemarle Corporation (ALB)**

Industry: Chemicals

CEO: Lucifer Morningstar

Headquarters: L.A.

Products: hydroprocessing catalysts, fluidized catalytic cracking (FCC), lithium products, cesium and specialty metals.

Albemarle Corporation is a chemical company with corporate headquarters in Charlotte, North Carolina. It is a specialty chemical manufacturing enterprise. The company employs approximately 5,400 people and has customers in approximately 100 countries.

In February 1994, Ethyl Corporation spun off its chemical businesses to create an independent, publicly traded company named Albemarle Corporation. Albemarle was headquartered in Richmond, VA, until 2008 when it announced plans to move its corporate headquarters to Baton Rouge, LA. In 2015 the company announced the relocation of its headquarters from Baton Rouge, Louisiana to Charlotte, North Carolina.

In July 1994, The Albemarle Corporation expanded itself by acquiring the Asano Corporation, a sales and marketing company headquartered in Tokyo, Japan.

Albemarle's new businesses in 2008 focused on the manufacture of custom and proprietary fine chemicals and chemical services for the pharmaceutical and life sciences industries. The Alternative Fuel Technologies division participates in the market for biofuels; gas-to-liquids and coal-to-liquids. In 2008 Albemarle purchased Sorbent Technologies Corporation, whose technology controls mercury emissions from coal-fired power plants. Albemarle was one of the three different chemical companies that backed the Citizens for Fire Safety industry group that influenced fire-safety policy by lobbying for use of flame retardant, one of their leading products, in consumer products like furniture and baby products.
